

ABSOLUTE CONCRETE

Pre Cast Concrete Oil / Grease Interceptor Trap

Absolute Concrete manufactures a range of precast Concrete Oil / Grease Interceptor Traps. These units provide a simple and effective solution to intercept the flow of greasy fluids and solids and store them before they are able to enter a pipe work system.

Product Description

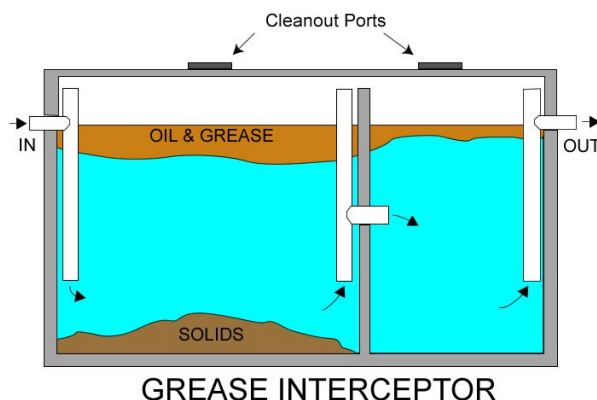

Interceptor Traps produced by Absolute Concrete are essentially a Precast Concrete container that acts to capture and retain greasy and or oily fluids inside the unit between its multiple chambers. The grease and oil rise to the top of each chamber while the rest of the liquid passes beneath. The interceptor trap may be supplied in a number of different sizes and capacities to match the required application and to conform with Local Authority regulations.

Application

Interceptor Traps are designed as an addition to Cafes, Restaurants, for Commercial Kitchens or for Protection prior to Wastewater systems.

Features

Interceptor Traps come in many sizes and configurations to suit a range of flow applications and regulatory requirements. They are fitted with strategically placed lifting anchors cast into the concrete, to allow for safe off-loading, and efficient and economical installation. Each unit is manufactured with either PVC or Earthenware fittings cast into the structure.

Manufacturing standards

Interceptor Traps by Absolute Concrete are produced in accordance with NZS.3109:1997. With surface finishes to NZS 3114:1987. They are manufactured in 40MPa concrete for high durability. Marine options are also available on request.
